editing

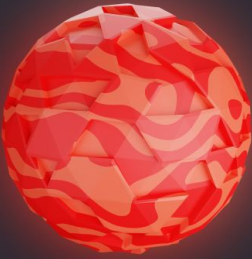

20

business solutions
covered

100+

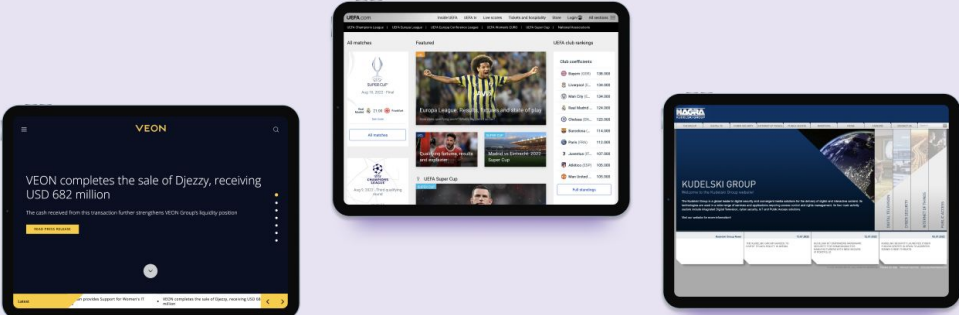

hours of video per day
are processed by
Cognitive Mill

4 pillars of the AIHunters' brilliance

Unique market-shaping tech

The combination of AI approaches never seen in M&E.
100+ business-oriented scientific + engineering achievements.
Adaptation to new cases takes mere days.
Tech transferable to other industries (surveillance, smart factory).

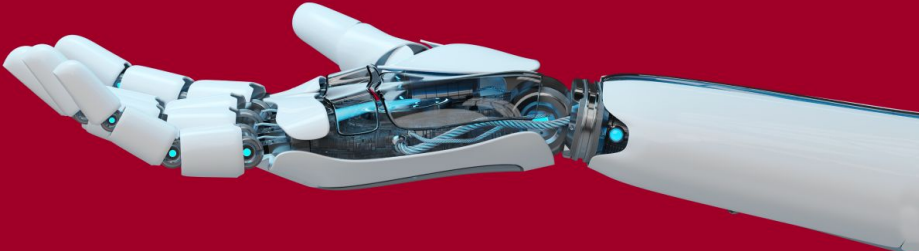

Industry-wide trust

Covering most-burning demands.
Thousands of hours of video already processes for the B2B partners.
Already integrated with the top players in the M&E industry:
VEON, UEFA, Kudelski Group.

Unstoppable team

Talented AI Scientists and engineers with exceptional knowledge in visual analysis, video processing, cloud architecture.
Dedicated founders and advisors with successful business launches.

Future-proof product

The companies are aiming for digital automation with human-mimicking decisions. We have it in COTS form.
We offer a universal adaptive virtual robot, not just limited cloud features.
